

GPT is a **customer solution-focused company**, specializing in end-to-end systems integration solutions using state-of-the-art software applications. Our **Buildings** group focuses on building management systems (BMS) for commercial, multi-family, industrial, K-12, and higher education buildings in Georgia and South Carolina, utilizing these systems to increase energy efficiency by leveraging smart controls for the building as a whole.

Our **competitively-priced smart building solutions** decrease the cost of building ownership while increasing the overall value of your building, meaning you realize a **return on your investment** sooner. With **predictive maintenance** your team can manage from **any web browser**, your on-site costs can be minimized as maintenance emergencies become a thing of the past.
